

H36-SERIES ENGINE DYNAMOMETER

H3610 Water Brake Engine Dynamometer

H3610 ENGINE DYNAMOMETER

The H36-Series engine dynamometer is specifically designed to handle the high torque output of diesel engines found in the mining, power generation, and marine propulsion industries. Based on the proven performance and reliability of our popular 45X-Series dynamometers, the H36 is destined to become the new industry standard for high torque, low speed diesel engine power verification and testing. When combined with PowerNet, our fully automated dynamometer control system, all of your testing needs may be performed at the touch of a button.

H36-Series

- For testing high torque diesel engines in the mining, power generation, and marine propulsion industries.
- Power ranges through 8,000 HP.
- Speeds to 2,500 rpm.
- Torque up to 45,000 lbs. ft.

A Complete Testing Solution

Power Test provides a full range of test cell support equipment and accessories, including engine carts, air start systems, drive shafts, resilient couplings, engine adapters, water recirculation and cooling systems, fuel measurement systems, smoke opacity meters, additional temperature and pressure sensors, and analog input channels. Whether you are dealing with new installation or looking to repair, upgrade, or replace an existing dynamometer, Power Test has a solution.

Power Test, Your Full Service Dynamometer Manufacturer

Power Test can provide facility design and installation of every dynamometer we sell. We also offer a complete line of support equipment, including ventilation systems, exhaust systems, auxiliary cooling systems, and water recirculation systems.

Contact your Power Test representative or visit our web site at www.pwrtst.com for more information.
